PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2+ years of experience building scalable, production-grade web applications using React, Java, Spring Boot and Node.js. Proven track record of delivering data-intensive UIs, reusable frontend components, and high-performance REST APIs in cross-functional Agile environments, collaborating closely with Product, QA, and DevOps teams. Strong foundation in Data Structures, System Design, and backend engineering, with hands-on experience in performance optimization, schema migrations, and distributed systems.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, C++

Frontend: React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Bootstrap, Redux

Backend: Spring Boot, Spring MVC, Spring Data JPA, , REST APIs, Kafka

Databases: MySQL, PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, IAM, Lambda, CloudWatch), Docker, Jenkins, GitHub Actions

Tools: Git, GitHub, Postman

AI Tools: GitHub Copilot, ChatGPT, Gemini,Antigravity

Core Concepts: Data Structures & Algorithms, OOP, Design Patterns, System Design, Scalability.

PROFESSIONAL EXPERIENCE

Full Stack Developer | *LPU Online*

May 2026 – Present

- Developed and maintained full-stack recruitment and hiring platforms supporting automated candidate management workflows.
- Built automation solutions using Google Workspace APIs including Gmail, Sheets, Drive, and Forms, reducing manual effort by 60%.
- Designed and implemented scalable RESTful APIs for workflow automation and third-party integrations.
- Developed frontend modules using React.js and backend services using Spring Boot and Node.js.
- Optimized application performance and database queries, improving response times and user experience.
- Collaborated across the Software Development Life Cycle (SDLC), including development, testing, deployment, and production support.

Software Engineer | *OTPless Solutions Private Limited*

Dec 2024 – Apr 2026

- Developed customer-facing applications and internal dashboards using React.js and TypeScript.
- Improved frontend performance by 30% and reduced UI-related production issues by 25%.
- Designed and integrated scalable RESTful APIs using Java and Spring Boot.
- Built reusable components and modular architecture improving maintainability and development speed.
- Developed a real-time alerting system using Redis Pub/Sub, reducing incident detection time by 50%.
- Participated in architecture discussions, code reviews, debugging, deployment automation, and production monitoring.
- Collaborated with product, QA, and engineering teams to deliver high-quality software solutions.

Full Stack Developer Intern | *Agami Technologies*

Mar 2024 – May 2024

- Improved application performance by 50% through caching strategies, indexing, and query optimization.
- Executed backend migration of 500,000+ user records while maintaining data integrity and system availability.
- Developed REST APIs and integrated frontend and backend services.
- Enhanced logging, monitoring, and error tracking systems to improve production reliability.

PROJECTS

Community Development Platform

React.js — TypeScript — Tailwind CSS

<https://radhakrishnagramvikaskendra.co.in/>

- Developed a scalable community engagement platform serving 1000+ active users.
- Built reusable and responsive user interfaces using React.js, Tailwind CSS, and shadcn/ui components.
- Optimized application performance through code splitting, lazy loading, and efficient state management.
- Integrated REST APIs for seamless communication between frontend and backend services.
- Implemented secure authentication and authorization mechanisms for role-based user access control.

ACHIEVEMENTS

- Solved 300+ Data Structures and Algorithms problems on LeetCode.
- Strong understanding of Low-Level Design (LLD) and System Design concepts.

EDUCATION

Bachelor of Technology (Computer Science and Engineering)

2020 – 2024

Noida Institute of Engineering and Technology (NIET), Greater Noida

Senior Secondary (Class XII)

2020

Sarvajanik Inter College, Jaunpur
